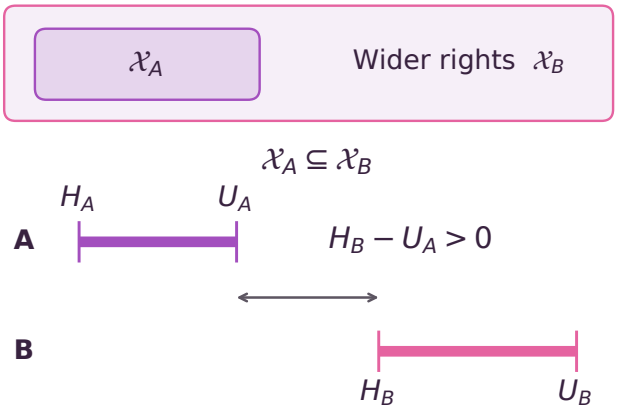
Contract rights and the value objects they identify

Hold fixed: admissions, realised prices, physics, baseline and terminal account

(a) Rights and their certified premium



Feasible value H; certified upper bound U
Schematic positions, no numeric scale

(b) Three distinct value objects

Policy saving S_W

One verified operating trajectory

PI opportunity $V_W^{PI} \in [H_W, U_W]$

Best feasible use of the historical path

Prospective value V_W^{P}

Adapted policy and expected future outcomes

A prospective contract price also needs information and tenant-cost evidence.
